Abstract

There is a rapid growth in geriatric population worldwide. As per "World Health Organization", 2014 the quantity of individuals matured 60 or more is relied upon to increment from 605 million to 2 billion, from 2000 to 2050. This exceptional growth can be attributed to the substantial decrease in birth rates during the past 25 years, the migration of younger people out of certain areas specially developing countries due to economic reasons, and the overall decrease in mortality rates. In developing countries decline of mortality from infectious diseases and in developed regions decline of mortality from coronary diseases due to better health services has taken place. (Colin D Mathers, Feb 2015). In 2003, in Australia 12.8% were matured 65 years or more and by 2021 this is anticipated to increment to 18%. (Mary Courtney, 2007) The 2006 statistics of Australia uncovered 22% of abroad conceived individuals in the nation and 400 dialects been talked the country over. At Victorian wellbeing administrations, populace over 70 years represent about 50% of healing center bed utilization or more 46% of day consideration patients are from over 70 years age bunch. (Comprehensive health assessment of the older person training Summary report, Oct 2013).
